PLASTIC BANK SCHOOLS PROGRAM

The Plastic bank School Program will conduct a practical and trackable initiative that encourages environmental responsibility through a structured collection system done through verified reporting. It is also designated to integrate smoothly into existing school operations and can complement ongoing school initiatives on environmental education and proper waste management. It is also in collaboration with ZUG-SIG Project supported by ZUG (Zukunft - Umwelt - Gesellschaft) a German-government owned, non-profit management agency established by Germany's Federal Ministry for the Environment. It is mandated to implement and supervise environmental programs, including international initiatives on waste reduction and marine litter. Thus, ZUG partners with SIG, a global packaging solutions company to support projects that help ensure recyclable materials are properly recovered and recycled.

The objective of issuing this activity is to reduce plastic waste and promote responsible recycling by supporting schools, communities, and institutions with incentive -based waste recovery systems

The target participants for this activity are school heads and/or designated coordinators to explain the mechanics, roles, reporting, and verification process.

Participation on this activity is subject to the no-disruption-of-classes policy provided under DepEd Order No. 9, s. 2005 titled Instituting Measures to Increase Engaged Time-on Task and Ensuring Compliance Therewith and the policy on off campus activities stated in DepEd Order No. 66, s. 2017

Dear Ma'am Marites,

Good day!

On behalf of **Plastic Bank**, we respectfully seek the endorsement of your **Schools Division Office** for the implementation of the **Plastic Bank Schools Program**, supported by the **ZUG-SIG Project**, in selected public and/or private schools within your Division.

The Plastic Bank Schools Program is a practical and trackable school-based plastic recovery initiative that encourages environmental responsibility through a structured collection system and verified reporting. It is designed to integrate smoothly into existing school operations and can complement ongoing school initiatives on environmental education and proper waste management.

The program enables participating schools to:

- **Engage learners, teachers, and personnel** in a structured, gamified recycling experience that encourages participation and environmental leadership
- **Provide Digital Rewards** to participants for verified plastic collections (as applicable under program mechanics)
- **Generate formal recognition**, including digital certificates and documented results for verified plastic recovery and sustainability efforts
- **Recognize and support key school personnel**, particularly janitors and/or designated waste champions, whose role in proper waste management is strengthened through clear responsibilities and acknowledgment
- **Extend environmental awareness beyond the campus**, influencing households and the wider community through learner participation

The **ZUG-SIG Project** is a collaboration supported by **ZUG (Zukunft – Umwelt – Gesellschaft)**, a German government-owned, non-profit project management agency established by Germany's Federal Ministry for the Environment. ZUG is mandated to implement and supervise environmental and climate-related programs, including international initiatives on waste reduction and marine litter. ZUG partners with **SIG**, a global packaging solutions company, to support projects that help ensure recyclable materials are properly recovered and recycled. Through this collaboration, the project works across Southeast Asia to reduce plastic

waste and promote responsible recycling by supporting schools, communities, and institutions with incentive-based waste recovery systems.

In line with this, we respectfully request the assistance of the Schools Division Office through the following:

1. **Issuance of a Division endorsement** (e.g., Division Memorandum/Advisory) encouraging interested schools to participate in the Plastic Bank Schools Program supported by the ZUG–SIG Project;
2. **Designation of a Division focal person** to coordinate with Plastic Bank for orientation, implementation timelines, and school-level coordination; and
3. **Permission to conduct a short orientation** (virtual or in-person, as feasible) for school heads and/or designated coordinators to explain the mechanics, roles, reporting, and verification process.

We would be grateful for the opportunity to discuss this initiative further through a short **15-minute virtual meeting or call**, at your convenience, to present the implementation flow and proposed rollout for your **Schools Division Office**.

Thank you for your continued commitment to education and environmental stewardship. We look forward to the possibility of partnering with your **Schools Division Office** in advancing responsible plastic waste management through meaningful school participation. For confirmation or inquiries, you may contact me at **0976-043-5470** or paulorpiada@plasticbank.com.

Respectfully yours,

A handwritten signature in black ink, appearing to read "Paul", with a large, stylized flourish at the end.
