DIVISION MEMORANDUM
No. 473, s. 2026

DISTRIBUTION OF IRON FOLIC ACID TABLETS TO ALL SECONDARY SCHOOLS AND GUIDELINES ON THE IMPLEMENTATION OF THE WEEKLY IRON FOLIC ACID (WIFA) PROGRAM

To: Assistant Schools Division Superintendents
Chief- Curriculum Implementation Division (CID)
Chief- School Governance and Operations Division (SGOD)
Education Program Supervisors
Public Schools District Supervisors
Public Elementary and Secondary School Heads
All Others Concerned

1. The Department of Health (DOH), in partnership with the Department of Education (DepEd), shall implement the school-based **Weekly Iron Folic Acid (WIFA) supplementation** in all public secondary schools for **female learners in Grades 7–10 and female learners in the Alternative Learning System (ALS)**. The program aims to prevent iron deficiency anemia and folate deficiency among female adolescents.

2. The implementation of WIFA supplementation in schools is expected to increase coverage and improve compliance among female learners, improve school performance, and reduce absenteeism due to ill health, thereby contributing to the reduction of school days lost due to absenteeism.

3. In support of this activity, the DepEd hereby reiterates the guidelines on the implementation of the **Weekly Iron Folic Acid (WIFA) Program**. (see attached)

4. Immediate dissemination of this Memorandum is desired.

MARITES A. IBAÑEZ, CESO V
Schools Division Superintendent

Guidelines on the Implementation of the Weekly Iron Folic Acid (WIFA) Program

A. SCHEDULE OF DELIVERY AND DISTRIBUTION

The **delivery of Iron Folic Acid (IFA) tablets from the DepEd Regional Office** to the Schools Division Office shall be on **October 1, 2026**.

The **distribution of IFA tablets to all public secondary schools** shall be conducted on **October 5, 2026**, through the respective sub-offices/districts.

Each sub-office shall receive **1,259 bottles of Iron Folic Acid tablets** intended for the **Secondary WIFA beneficiaries**, subject to the prescribed allocation and distribution procedures.

Public Secondary School Heads shall ensure the proper receipt, safekeeping, inventory, and distribution of the IFA tablets to the intended beneficiaries in accordance with the WIFA guidelines.

B. GUIDELINES ON THE IMPLEMENTATION OF WIFA

The WIFA shall be done simultaneously in all public high schools for all enrolled **Grades 7 to 10 female learners** in public high schools and in the **Alternative Learning System (ALS)**.

Each beneficiary shall be provided by the clinic teacher with **one tablet containing 60 mg elemental iron with 400 µg folic acid**, with film coating, to be given **once a week every Monday** for a total of **24 weeks** in a given school year.

All public high schools and ALS shall secure **consent from parents/guardians** for WIFA supplementation. Learners with no consent will still be included in the master list but will not be provided with IFA tablets until consent has been secured.

Prior to administration of the IFA supplement:

- Female learners shall be screened by the school nurse/classroom teacher to determine if they have been **dewormed within the last six (6) months**.
- If **yes**, administer the IFA tablet.
- If **not**, deworm first, then administer the IFA tablet after **2–3 days**.

  This is to avoid possible interaction between the deworming drug and Iron Folic Acid supplementation.

Intermittent WIFA supplementation based on the World Health Organization (WHO) recommendation will be given in **two rounds**. The first round shall be from **October to December 2026**, followed by the second round from **January to March 2027** for each school.

Before the start of supplementation, an annual masterlist of female learners enrolled in **Grades 7–10 and ALS** shall be prepared. Orientation of parents/guardians and learners on the benefits and importance of WIFA supplementation, as well as the management of possible side effects such as constipation and blackening of stool, shall likewise be conducted.

In case the learner is absent, the supplement for the week shall be given on the day she returns to school. In case the beneficiary is absent for the whole week, the supplement for the previous week shall be given on the day she returns and the current week's supplement **1–2 days after**.

Iron Folic Acid supplements shall be administered **on a full stomach** to avoid gastric discomfort.

If the learner is currently taking multivitamins, WIFA may still be administered while taking the multivitamin.

In case the learner has been previously diagnosed with anemia and is receiving therapeutic doses of iron, IFA shall no longer be given. Once the therapeutic treatment has been completed, WIFA supplementation shall be started to prevent recurrence of anemia.

In case the learner has been screened positive for **G6PD**, the learner shall be given the IFA tablet as it is not a contraindication for iron supplementation.

For ALS learners, administration of Iron Folic Acid shall be conducted based on the agreed schedule between the ALS Coordinator and the learners.

Iron Folic Acid tablets may cause minor side effects such as **gastric discomfort, constipation, and blackening of stool**. If experienced by the learner, these may be reported to the classroom teacher/school nurse for appropriate management and counseling. If symptoms persist, the learner may be referred to the **Rural Health Unit (RHU) or Barangay Health Center** for further evaluation and management.

C. REPORTING AND DOCUMENTATION

All School Heads shall submit to the Schools Division Office (SDO) a report on the eligible population, including:

- Total number of female learners enrolled in Grades 7–10 and ALS;

- Total number of female learners who completed the prescribed WIFA cycle;
- Observations;
- Issues/challenges encountered; and
- Recommendations.

Hardcopy/Softcopy reports shall be submitted to the respective **Sub-Office Nurse after every round** for consolidation.

The **first-round report shall be submitted on or before December 18, 2026**, while the **second-round report shall be submitted during the last week of April 2027 (Friday)** using Forms 1, 2a, 2b, and 3.

The following forms shall be accomplished by the designated personnel:

- **Form 1** – to be accomplished by the Class Adviser
- **Form 2a** – to be accomplished by the Grade Level Chairman
- **Form 2b** – to be accomplished by the Clinic Teacher/Health Coordinator
- **Form 3** – to be consolidated by the District Nurse
- **Form 4** – WIFA Coordinator

No. 59, s. 2017

GUIDELINES ON THE WEEKLY IRON FOLIC ACID SUPPLEMENTATION FOR FEMALE ADOLESCENT LEARNERS IN PUBLIC HIGH SCHOOLS

To: Undersecretaries
Assistant Secretaries
Bureau and Service Directors
Regional Directors
Schools Division Superintendents
Public Secondary Schools Heads
All Others Concerned

1. The Department of Education (DepEd) issues the enclosed **Guidelines on the Weekly Iron Folic Acid (WIFA) Supplementation for Female Adolescent Learners in Public High Schools**, for the information and guidance of all concerned.

2. Immediate dissemination of and strict compliance with this Order is directed.

MCDJ/ R DO Guidelines on the WIFA for Female in Public High Schools
0862/September 15, 2017

(Enclosure to DepEd Order No. 59, s. 2017)

GUIDELINES ON THE WEEKLY IRON FOLIC ACID (WIFA) SUPPLEMENTATION FOR FEMALE ADOLESCENT LEARNERS IN PUBLIC HIGH SCHOOLS

I. RATIONALE

The 2013 National Nutrition Survey (NNS) conducted by the Food and Nutrition Research Institute (FNRI) reveal that 1 out 10 adolescents aged 13–19 years old suffer from anemia. Learners, especially female adolescents, are vulnerable to anemia because of their menstruation, rapid growth, increased iron requirement and high prevalence of parasitic infection resulting to loss of iron in the blood.

The Department of Health's AO No. 2010-0010 entitled "Revised Policy on Micronutrient Supplementation to Support Achievement of 2015 MDG Targets to Reduce Under-Five and Maternal Deaths and Address Micronutrient Needs of Other Population Groups" issued in 2010 has identified iron and folic acid supplementation for women of reproductive age, including adolescents, as one of the interventions to address IDA and folate deficiency among women.

Considering also that most adolescents are in school and do not usually go to the health center to access health services, the Department of Health (DOH) partnered with the Department of Education (DepEd) to implement a school-based Weekly Iron Folic Acid (WIFA) Supplementation for grades 7 - 10 female school children. Prevention of iron deficiency anemia among female adolescents will improve the adolescents' school performance and reduce absenteeism due to ill health thus, contributing to the reduction of about 200-500 million school days lost due to absenteeism.

WIFA will be a component of the Menstrual Health Management Project of DepEd to address knowledge gaps and support learners many of whom do not have the means for self-care and do not get the support they need when they face problems related to menstruation, including anemia. Such problems, if not addressed, hinder the female learner's ability to carry on with everyday activities and may also establish a foundation for life-long disempowerment.

II. POLICY STATEMENT

This policy shall provide guidance to DepED personnel in administering the Weekly Iron Folic Acid (WIFA) supplementation among female adolescents enrolled in grades 7 to 10 in public high schools and those adolescents enrolled in the Alternative Learning System of the Department of Education.

III. SCOPE AND COVERAGE

The Weekly Iron Folic Acid (WIFA) supplementation is a nationwide routine activity in all public high schools targeting Grades 7 to 10 female adolescent learners and those in the Alternative Learning System (ALS).

IV. DEFINITION OF TERMS

Iron	Iron is an essential trace mineral that is needed for hemoglobin formation. Hemoglobin is part of the red blood cells and gives blood its red color.
Folate	Folate is a water-soluble B vitamin. Folate is the form found in foods while folic acid is a synthetic compound of folate and is the form available as supplement. Folic acid helps the body make healthy new cells, helps form red blood cells and helps produce DNA, the building block of the human body, which carries genetic information.
Folate Deficiency	Folate deficiency is usually linked or coupled with iron deficiency anemia. Folate deficiency is also a known factor to cause certain neural tube defects
Iron Deficiency Anemia	It is a disorder resulting from the decrease in the number of red blood cells due to lack of iron and/or folate. It is the most common nutritional deficiency in the world and occurs if the amount of iron and/or folate absorbed is too little to meet the body's needs.
Micronutrient	A dietary element essential only in small quantities.
Micronutrient Supplement	Vitamins and minerals in concentrated form alone or in combinations taken to supplement the intake from the normal diet.
Micronutrient Supplementation	A short to medium term intervention intended to prevent and/or correct high levels of micronutrient deficiencies by providing large doses of micronutrients immediately until more sustainable food-based approaches (e.g. food fortification and diet diversification) are put in place and become effective.
Full Stomach	Having just recently eaten to the point of being full
Gastric discomfort	Any kind of discomfort in the stomach or other organs in the upper abdomen
Alternative Learning System	A parallel learning system that provides a practical option to the existing formal instruction. When one does not have or cannot access formal education in schools, ALS is an alternate or substitute. ALS includes both the non-formal and informal sources of knowledge and skills.

V. GENERAL GUIDELINES

1. WIFA Supplementation is a collaborative activity between the Department of Health and the Department of Education. It shall be a nationwide routine activity to be done simultaneously for all Grades 7-10 female learners in public high schools and in the Alternative Learning System (ALS)
2. The Department of Health shall provide the required iron and folic acid (IFA) tablets to cover all eligible female learners
3. The Department of Education shall implement the WIFA supplementation in all public high schools and in the Alternative Learning System

4. All public high schools and ALS shall secure consent from parents/guardians for WIFA Supplementation; learners with no consent will still be included in the masterlist but will not be provided with IFA tablets until a consent has been secured
5. All records and reports generated by DepEd for this activity shall be shared with concerned local health offices and the Department of Health regional and central offices

VI. SPECIFIC GUIDELINES

1. Target Population

All Grades 7 to 10 female adolescent learners in public high schools and in the Alternative Learning System shall be the recipients of the intermittent WIFA supplementation every July to September (first round) and January to March (2nd round) of each school year.

2. Drug, Dose and Schedule of Administration

2.1. Iron folic acid (IFA) tablet preparation

Iron folic acid (IFA) tablets contains 60 mg elemental iron and 400 ug folic acid with film coating

2.2. Iron folic acid (IFA) tablet administration

2.2.1. Intermittent WIFA supplementation based on the World Health Organization (WHO) recommendation shall be given as follows:

# of Implementation Rounds	Schedule	Dose per Learner
I	July to September	1 tablet per week
II	January to March	1 tablet per week

The IFA tablet shall be administered on a full stomach to avoid gastric discomfort

2.2.2. Prior to administration of IFA supplement:
- Female learners shall be screened by the school nurse/classroom adviser if they have been dewormed within the last six months
- If yes, give the IFA tablet
- If not, deworm first then administer the IFA tablet after 2-3 days

2.2.3. In the event that the learner was given consent only for WIFA supplementation but not for deworming, the parents of the female learner shall be encouraged by the nurse/classroom teacher to likewise give consent for deworming as the benefits of WIFA supplementation will be maximized only if the learner has been dewormed first.

2.2.4. The school nurse/classroom teacher shall administer IFA tablet every Monday or the next school day if it falls on a holiday or declared no school day and shall observe that the learner swallows the tablet.

2.2.5. In case the learner is absent on the day of WIFA administration, the supplement for the week shall be given on the day she returns to school.

2.2.6. In case the learner is absent for the whole week, the supplement for the previous week shall be given on the day she returns and the current week's supplement 1-2 days after.

2.2.7. If the learner is currently taking multiple vitamins, WIFA can still be administered while taking the multivitamin.

2.2.8. In case the learner has been previously diagnosed with anemia and receiving therapeutic doses of iron, IFA shall no longer be given. Once the therapeutic treatment has been completed, WIFA supplementation shall be started to prevent recurrence of anemia.

2.2.9. In case the learner has been screened positive for G6PD, the learner shall be given IFA tablet as it is not a contraindication for iron supplementation

2.2.10. For ALS, administration of iron folic acid shall be as per agreed schedule between the ALS coordinator and the learners.

2.3. Expected Drug Reaction

2.3.1. Iron folic acid tablet has only minor side effects such as gastric discomfort, constipation and blackening of stool.

2.3.2. These side effects, if experienced by the learner, may be reported to the classroom teacher and/or the school nurse for management and provision of appropriate counselling.

2.3.3. If the learner's symptoms persist, the school nurse may refer the learner to the Rural Health Unit or Barangay Health Center for further evaluation and management.

2.4. Drug Storage

2.4.1. Iron folic acid tablets are sensitive to heat and shall be stored in a cool dry place at all times

2.4.2. Once opened, the iron tablets should not be removed from the High Density Polyethylene (HDPE) bottle to preserve its potency

2.4.3. If possible, opened bottles should be used immediately.

VII. ROLES AND RESPONSIBILITIES:

A. Department of Education (CO)

1. Bureau of Learner Support Services-School Health Division (BLSS-SHD)

a. Develops policies and issue memoranda/orders on the concern;
b. Prepares annual targets and documents to support request for commodities from the Department of Health

c. Collaborates with the DOH and other local and international institutions/organizations on the development of Operational Guide for WIFA supplementation for Adolescent Girls in schools, capacity building for the implementation of the Operational Guide, complimentary school-based nutrition intervention, behaviour change communication activities, recording reporting and evaluation of the supplementation program.
d. Coordinates with the DOH on the delivery of WIFA tablets for distribution to targeted schools.
e. Consolidates and submits reports to DOH
f. Monitors and provides technical assistance to ROs and SDOs in the implementation of this policy.

2. Regional Offices (ROs)

a. Determines annual targets of the region and prepare sub-allotment to SDOs or conduct the actual procurement of iron with folic acid tablets for SY 2017-2018 only;
b. Coordinate for Region Supply Delivery and Logistic with DOH Regional Office and DepEd CO for SY 2018 and onwards;
c. Conducts regional orientation, to schools, division / SDOs on the activity
d. Consolidates submitted reports from the SDOs and submit to BLSS-SHD and DOH-regional counterpart; and
e. Monitors and provide technical assistance to SDOs/Schools on the implementation of the activity.

3. School Division Offices (SDOs)

a. Determines annual targets of the division and submit the data to the RO;
b. Distributes the iron with folic acid tablets to the schools
c. Conducts information dissemination to school heads PTCA and students; and
d. Consolidates reports of schools/district offices and submit to DepEd Regional Office
e. Monitors and provides technical assistance to schools to ensure successful implementation of WIFA supplementation.
f. Designates WIFA focal/point person (WIFA coordinator).

4. Schools

a. The School Head shall develop a protocol on the following:
   - Assignment of a WIFA Supplementation point person
   - Preparation of the master list of female students in Grades 7-10 and ALS to be given weekly iron and folic acid supplements
   - Orientation and coordination with PTA and other stakeholders on the WIFA supplementation
   - Administration of IFA tablets every Monday of the week through a school nurse or a teacher
   - Storage, inventory and distribution of iron with folic acid tablets.
   - Collect parent consent together with immunization and deworming

b. Prepares and submit reports on the number of female students who received supplementation, observations, issues encountered, and recommendations.

B. Department of Health

1. Central Office (DOH-CO):

a. Formulates guidelines and procedures on the implementation of WIFA supplementation and disseminate to Regional Offices, LGUs and other stakeholders
b. Prepares a Memorandum of Agreement in consultation with DepEd
c. Issues a Department Memorandum on the implementation of WIFA supplementation
d. Prepares a Communication plan and prototype materials for WIFA supplementation advocacy and promotion in schools
e. Procures, allocates and distributes in a timely manner all required iron with folic acid tablets to be distributed among Grades 7-10 and ALS female students

2. Regional Office (DOH-RO)

a. The Regional Nutritionist assisted by the Regional Adolescent Health Development Program Coordinator supervised by the Office of the Regional Director and the Concerned Cluster Head shall be the focal points for the WIFA Supplementation implementation.
b. Disseminates guidelines and procedures on the implementation of WIFA Supplementation
c. Reproduces and disseminates communication plan and prototype of IEC materials
d. Coordinates with DepEd regional counterpart during the pre during and post WIFA supplementation project implementation
e. Monitors the implementation of WIFA supplementation and submit reports to DOH-Central Office using the prescribed forms and following the reporting schedules

3. Rural Health Units/ Barangay Health Centers

a. Provides WIFA to Grades 7 to 10 in private high schools, out-of-school adolescents and women 10 - 49 years old not covered by the WIFA supplementation in public high schools
b. Assists the school health personnel in information dissemination among parents on the benefits of WIFA Supplementation
c. Manages referred cases of persistent minor drug reactions like constipation, gastric discomfort and blackening of stool.

VIII. MONITORING AND EVALUATION

1. Recording and Reporting Forms (Annex A)

Form 1: Recording Form – This form shall be accomplished by the class adviser which lists all female learners provided and not provided with WIFA and other relevant information about them per class to be submitted to the Grade Level Chairman.. This form shall be retained to the class teacher as reference.

Form 2a: Grade Level Report – This form shall be accomplished by the Grade Level Chairman to consolidate the classroom level reports submitted by the class advisers and to be submitted to the WIFA Supplementation point person. The first round report is due every 2nd weekof October while the second round report will be due every second week of April. Filled up Form shall be retained to the classroom teacher as guide for the second round.

Form 2b: School Level Report- This form shall be accomplished by the school WIFA Supplementation point person, to be signed by the principal and the school nurse for consolidation within two weeks after the due for Grade Level Report submission.

Form 3: District Level Report- This form shall be accomplished by the district point person, to be signed by the district supervisor and to be submitted to the division point person one week after the due date for School Level Report submission. Once approved, a copy shall be furnished to the Municipal Health Office.

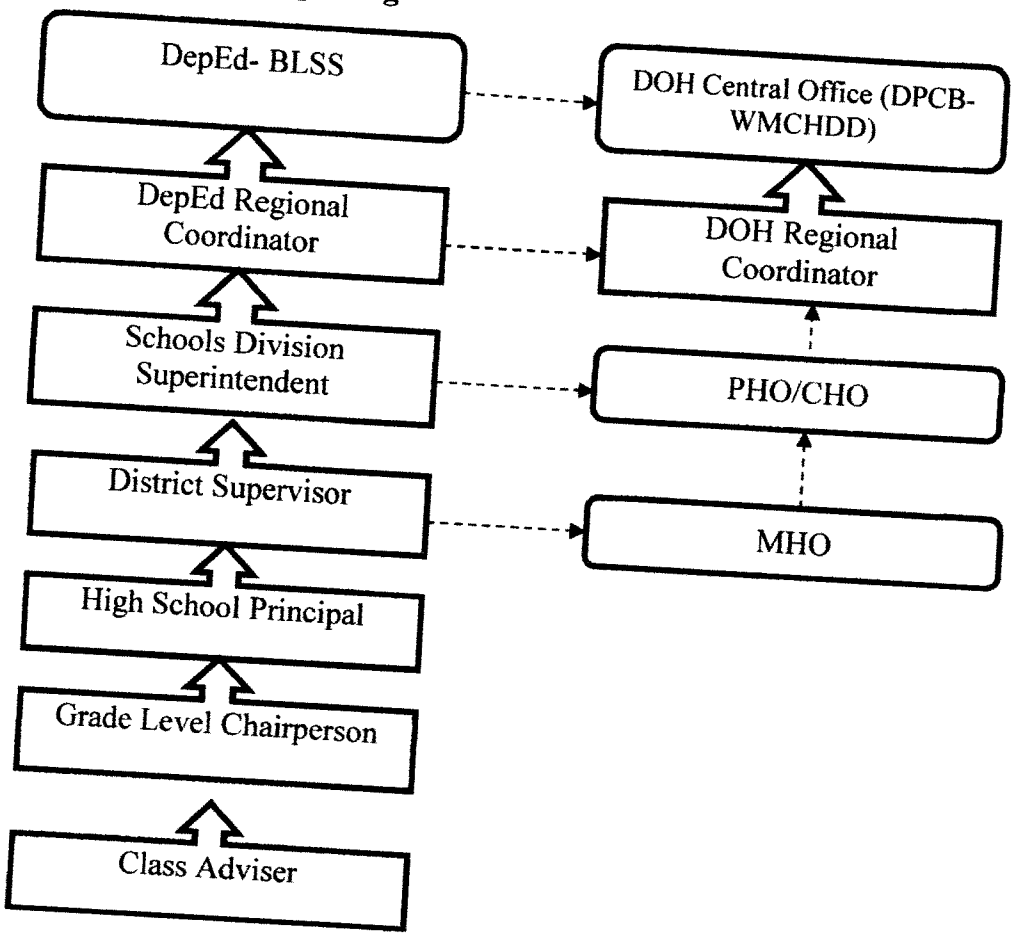

Form 4: Division Level Report - This form shall be accomplished by the division point person, to be signed by the schools division superintendent and to be submitted to the regional point person one week after the due date for District Level Report submission. Once approved, a copy shall be submitted to the Provincial/City Health Office.

Form 5: Regional Level Report - This form shall be accomplished by the regional point person, to be signed by the regional director and to be submitted to the national point person one week after the due date for Division Level Report submission. Once approved a copy shall also be submitted to the Regional DOH Office for submission to DOH-CO.

Form 6: National Level Report - This form shall be accomplished by the national point person, to be signed by the Director of the Bureau of Learner Support Services (BLSS) and to be submitted to the Office of the Undersecretary. Once approved a copy shall also be submitted to the Women, Men and Children's Health Development Division of DOH-CO

before the end of December and June for the first and second round, respectively.

Flow of recording and reporting

IX. EFFECTIVITY

This policy shall take effect immediately.
